Worksheet for the PCEP Draft

NAME _____   **Draft Number** _____

Previous Rotations (company and track):

_____

A core component of the PCEP program is the rotation through three mandatory tracks (Development, Quality Assurance and Development Operations) and a minimum of two companies. This ensures the graduating PCEP student experiences the full software development lifecycle and at least two different company cultures and development methodologies. For each of the companies listed, please mark your preference from "1" (most desirable) to "n" (least desirable), as well as your Track preference ("1" is most desirable). If a company does not offer a track you have not yet experienced, mark it with an "X."

You will be assigned to the most desirable company that can accommodate your Track requirements, such that all interns' overall preferences are maximized. Once informed of your placement, you will have 24 hours (not including weekends) to accept the placement. Failure to accept the placement in writing (or by e-mail) within this period will be assumed to be a rejection of the placement, and you will be dropped from the PCEP program.

For Fall 2015, your worksheet is due Monday, October 19 by 6PM
